

Caryopteris 'Hint of Gold' wins Bronze medal at Plantarium 08

This new cultivar of *Caryopteris* from Liss Forest Nursery Ltd was awarded a bronze medal at Plantarium 2008.

The plant is a result of several years of trying to get hardiness into a large leaved low altitude form of *Caryopteris incana* using a selected yellow seedling as the male. The plants bush well from low down and make a neat yellow plant early in the season.

With extra large yellow leaves which glisten in the sun and long spikes of blue flowers, this is a delightful addition to the autumn shrub range.

Material available through ProVaR for sales from 2009
