

Caryopteris 'Sterling Silver' is awarded a silver medal at Plantarium 08

This new silver leaved, blue flowered Caryopteris is being launched by Liss Forest Nursery Ltd.

Everyone who sees the plant immediately admires the silver foliage. Indeed the plant was awarded a silver medal even though it was still in tight bud, partly because of the poor summer, but also because it is a later flowering variety. It is a neat grower, and is a seedling from Caryopteris x clandonensis 'Longwood Blue'.

Due to enter the 2009/10 offers brochure of ProVaR, material will be available to ProVaR licensees from next summer.
