

## **ProVaR at Woking**

ProVaR attended the Woking show for the first time on July 9<sup>th</sup>. To have the opportunity to show off our plants at this specialist Nursery show was a great opportunity and despite the best efforts of the Rain and wind the show was well attended by an optimistic crowd!

We received excellent feedback and some very positive comments about the range of plants on display which included some firm favourites such as Choisya Sundance (brica) and Hebe Purple Shamrock (neprock) as well as a range of new plants including Leucothoe Curly Red – for more details see our web site or request a copy of the new offers listing.

Interest came from growers, garden centres and landscapers, with comments made that often information about new varieties is not fed quickly into the amenity market as quickly, this feedback was also received when we exhibited at GAN and more recently At Wyevale East. Possibly we should all be working harder to share our new plants with Architects, designers, specifiers and Landscape gardeners
